Correction to: *Molecular Psychiatry* <https://doi.org/10.1038/s41380-025-03387-1>, published online 20 December 2025

In the article above the final sentence of the Abstract should have read “Overall, our research implicates the 5-HT1BR, a non-hallucinogenic serotonin receptor, as a potential mediator of the behavioral and neural effects of psilocybin in mice.” The final sentence of the Introduction should have read “Our findings suggest that the 5-HT1BR influences brain-wide neural changes following psilocybin administration and may contribute to its enduring antidepressant-like effects in mice.” The first sentence of the second paragraph of the Discussion should have read “Though we find that 5-HT1BR contributes to the persisting effects of psilocybin, our data do not address its sufficiency. The original article has been corrected.
